Research Projects of Students 2017

2017	Using Google VR library to build virtual reality games on mobile platforms	Do Xuan Thanh	Nguyen Minh Phuc
2017	Using Karios to recognize faces and apply to build student attendance software	Hong An Palace	Ta Nguyen
2017	Building the process of optimizing website on google search engine based on new methods.	Nguyen Tan Vinh	Ta Nguyen
2017	Research and build search engine optimization process for e-commerce website	Truong Huu Nhon	Ta Nguyen
2017	Researching Unreal Engine 4 and the application to write game illustrations	Tran Hoang Hiep	Do Quoc Bao
2017	TensorFlow application builds face recognition and object detection system on NAO robot	Cao Minh Tien	Nguyen Minh Son
2017	Building a NAO robot application that recognizes and holds objects	Nguyen Trong Tri	Nguyen Minh Son
2017	Applying TensorFlow machine learning tool to NAO robot to improve the solution of English language communication with children	Dao Minh Tri	Nguyen Minh Son
2017	Building object recognition and moving to object system based on NAO robot platform	Truong Ngoc Hai	Nguyen Minh Son
2017	Research and application of TensorFlow in flower identification on mobile platforms	Nguyen Thanh Quan	Nguyen Minh Son
2017	Solution to prevent DNS attack in LAN system	Anousith Saphangthon	Nguyen Hoang Liem
2017	Deploying LAN systems and services using IPv6 to connect to the Internet IPv4	Phonexay Namsavanh	Nguyen Hoang Liem
2017	Design and build a network system, using Nessus to detect vulnerabilities and how to fix them	Do Hong Hai	Nguyen Hoang Liem
2017	Researching network attack techniques and building network security solutions	Tran Hoang Vien	Nguyen Vu Duy Quang

Year	Title	Student	Supervisor
2017	Building a secure network and intrusion detection system for small and medium enterprises	Do Minh Thanh	Nguyen Vu Duy Quang
2017	Using open source BigBlueButton to build Web Conferencing	Truong Hoai Vuon	Nguyen Vu Duy Quang
2017	OSPFN Routing Protocol for Named Data Networking	Nguyen Tan Xuan	Nguyen Vu Duy Quang
2015	Building a system to control and manage devices in the house by Smartphone	Phan Thien Phuoc	Lam Thanh Hien
2015	Researching Cocos2d-x programming engine and illustrated game writing application	Nguyen Cong Khang	Vu Dinh Trung
2015	Build a system to search for places to eat on Android	Nguyen Vu Hung	Vu Dinh Trung
2015	Analysis of product reviews on several e-commerce sites	Nguyen Thanh Huy	Ta Nguyen
2015	Building a website to evaluate mobile devices	Phan Minh Luan	Chu Nguyen Hoang Minh
2015	Advanced Printer Server solution for a self-contained campus based on Raspberry PI . computer	Tran Thi Hau	Nguyen Minh Son
2015	Design learning and entertainment robots	Nguyen Phung Duong	Pham Cong Xuyen
2015	Learn and apply Augmented Reality on Android mobile devices	Palace of Van Tu	Truong Thi Quynh Huong
2015	Semantic similarity between two sentences and application in text summarization	Vu Thanh Hieu	Nguyen Minh Phuc
2015	Find the performance of PostgreSQL database management system and application	Tran Thi Thanh	Do Quoc Bao
2015	Simulation method to control smart traffic lights on Raspberry PI . computer	Pham Quang Trung	Nguyen Minh Son
2015	Learn Zend Framework and current new Web design technologies, application building information management system for students' internship	Duong Van Canh	Ta Nguyen
2015	Research on centralized management system of Wifi devices by SDN	Le Ngoc Quy	Nguyen Hoang Liem
2015	Developing a program to support learning Database - SPDATABASE	Pham The Nhai Luong Quoc Viet	Pham Cong Xuyen
